### Blended Learning

- Combination of theory delivered online via e-Learning while the practical portion of technical training takes place at the shop facilities of the training provider
    - the e-Learning portion consists of educational materials such as digital and multimedia learning objects, simulations, videos and electronic apprentice assessments, and provides opportunities for apprentices and instructors to interact in a virtual classroom
    - the e-Learning interactive elements may be used in conjunction with Individual Learning Modules (ILMs)
-
